

Why Cross-Borders Leadership (CBL)?

At CBL you will benefit from an incredible global experience using the best available evidence in professional development. Focused on practical implementation, you will lead an early childhood education (ECE) project in your context. Working alongside a global Fellowship, you will not only learn about ECE around the world, but also be motivated by a powerful community of leaders in ECE.

"This project empowers my experience and increases my potential due to the diversity of participants" Lebanon educator, CBL Pilot Fellow

Who are we looking for?

CBL is looking for passionate Early Childhood Educators to work together and become proactive agents of change. Diversity is key to success at CBL and are looking for applicants from around the world, all cultures and backgrounds.

The Fellowship develops your leadership through project implementation, so you should be able to design and deliver a project in your own context.

Applicants must be willing to commit from January - June 2022. For this project, you will need to be able to engage in an English-language programme.

CBL values

Empathy

Transparency

*Shared
responsibility*

Collaboration
